

1 **Abstract of Disclosure**

2 An armrest assembly is disclosed. The armrest assembly includes a
3 stationary tube for attachment to a chair. The stationary tube includes
4 recesses in an internal face. A movable tube is inserted in the stationary
5 tube. The movable tube includes an aperture. An armrest is installed
6 on the movable tube. A detent can be inserted into one of the recesses of
7 the stationary tube through the aperture of the movable tube. A rod is
8 inserted in the movable tube. The rod defines a recess for receiving the
9 detent. The recess of the rod includes a shallow portion and a deep
10 portion. A lever is connected with the rod and installed on the armrest
11 in order to move the rod so as to control the detent.
